DERAKO® - FORECO®

A combination of unique strengths

The DERAKO® FORECO® façade system is the result of the strategic collaboration between DERAKO International B.V. and Foreco Dalfsen B.V. FORECO specialises in sustainable and innovative timber solutions for the construction industry and DERAKO is a progressive player in the development, processing and use of wood for unique ceiling, wall and façade systems. Using the FORECO WaxedWood® Siberian Larch slats within the DERAKO façade system means it is now also possible to use this product on façades without the need for (pre) drilling, screwing or nailing. The façade system is easy to assemble and needs no maintenance from a technical point of view. The preserved and water repellent WaxedWood also meets the social sustainability needs because of its unique characteristics.

DERAKO façade system ...

- Fastening on the rear, completely invisible
- Slat fastening without screws or nails - avoids damage and corrosion stripes
- Fully detachable system
- Indoor and outdoor applications
- Horizontal or vertical placement of the slats
- 100% recyclable materials
- Quick and easy assembly
- Modular delivery ideal for prefabricated construction
- Project support and design freedom - your creativity is our guide

with FORECO WaxedWood®

- Preserved Siberian Larch wood with water and dirt repellent effect
- Reduced shrinkage and expansion
- Quality assurance with KOMO certification
- Excellently protected against degradation from things such as blue mould and unpalatable for various insects
- Wonderful fading, from a greeny brown to a warm bronze brown colour depending on the weather (see photograph above)
- Maintenance free and widely applicable
- FSC® or PEFC certified timber
- Project guarantee possible, with SGVH certificate
- DUBOkeur durability mark of approval for wooden façade products

SLR clip

Patented façade clips in stainless steel AISI 301.

SLR profile

The aluminium profile is black anodised. It is also possible to use curved profiles.

WaxedWood slats

WaxedWood is maintenance free without paint and puts an end to any deterioration. A 15 year project warranty is available on the timber, administered by the SGVH.

Paint finishes

WaxedWood is available with or without a paint finish (in various colours). The paint does not bladder and this coating system can be supplied including warranty and maintenance.
